Status of the Claims

Claims 1-30 have been presented for examination.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 15, 18-19, drawn to an aziridine compound.

Group II, claim(s) 9-14, 16-19, drawn to a complex of an aziridine compound and a methyltransferase.

Group III, claim(s) 20-29, drawn to a method of modifying a target molecule with an aziridine and a methyltransferase.

Group IV, claim(s) 30, drawn to a modified molecule.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I, II and IV are each drawn to distinct products that do not share a special technical feature. Group I is a family of aziridine compounds, Group II is a complex of the compounds with methyltransferases. Depending on the enzyme, the complex may involve covalent complex and transfer to an enzyme nucleophile to form a modified enzyme. Other

enzymes whose mechanisms involve SN2 direct transfer may have a modified intermediate.

Group IV has had part of the aziridine compound transferred to the acceptor. Group III is a method of making the product of Group ~~IV~~.

In addition, this application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) aziridine compounds
- b) methyltransferases
- c) target molecules
- d) modified target molecules

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1651

The claims are deemed to correspond to the species listed above in the following manner:

- a) aziridine compounds (if Groups I-III are elected)
- b) methyltransferases (if Groups II-III are elected)
- c) target molecules (if Group III is elected)
- d) modified target molecules (if Group IV is elected)

The following claim(s) are generic: 1, 9, 20 and 30.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: there is no technical feature linking these different species between each other. Within species (a), the compounds have an extremely wide range of possible modifications; within species (b) the enzymes have diverse target molecules from DNA to catecholamines; within (c) and (d) the targets and modified targets are quite diverse as indicated under item (b).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
